Consent and Release from Liability Certificate for Concussions (Page 2 of 4)

This completed form must be kept on file by the school. This form is valid for 365 calendar days from the date of the most recent signature.

School: The Conservatory School @ NPB School District (if applicable): Palm Beach County

Concussion Information

Concussion is a brain injury. Concussions, as well as all other head injuries, are serious. They can be caused by a bump, a twist of the head, sudden deceleration or acceleration, a blow or jolt to the head, or by a blow to another part of the body with force transmitted to the head.

Signs and Symptoms of a Concussion:

Concussion symptoms may appear immediately after the injury or can take several days to appear. Studies have shown that it takes on average 10-14 days or longer for symptoms to resolve and, in rare cases or if the athlete has sustained multiple concussions, the symptoms can be prolonged.

- Vacant stare or seeing stars
• Lack of awareness of surroundings
• Emotions out of proportion to circumstances (inappropriate crying or anger)
• Headache or persistent headache, nausea, vomiting
• Altered vision
• Sensitivity to light or noise
• Delayed verbal and motor responses
• Disorientation, slurred or incoherent speech
• Dizziness, including light-headedness, vertigo(spinning) or loss of equilibrium (being off balance or swimming sensation)
• Decreased coordination, reaction time
• Confusion and inability to focus attention
• Memory loss
• Sudden change in academic performance or drop in grades
• Irritability, depression, anxiety, sleep disturbances, easy fatigability
• In rare cases, loss of consciousness

DANGERS if your child continues to play with a concussion or returns too soon:

Athletes with signs and symptoms of concussion should be removed from activity (play or practice) immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to sustaining another concussion.

Steps to take if you suspect your child has suffered a concussion:

Any athlete suspected of suffering a concussion should be removed from the activity immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without written medical clearance from an appropriate health-care professional (AHCP).

Return to play or practice:

Following physician evaluation, the return to activity process requires the athlete to be completely symptom free, after which time they would complete a step-wise protocol under the supervision of a licensed athletic trainer, coach or medical professional and then, receive written medical clearance of an AHCP.

For current and up-to-date information on concussions, visit http://www.cdc.gov/concussioninyouthsports/ or http://www.seeingstarsfoundation.org

Statement of Student Athlete Responsibility

Parents and students should be aware of preliminary evidence that suggests repeat concussions, and even hits that do not cause a symptomatic concussion, may lead to abnormal brain changes which can only be seen on autopsy (known as Chronic Traumatic Encephalopathy (CTE)).

I acknowledge the annual requirement for my child/ward to view "Concussion in Sports-What You Need to Know" at www.nfhslearn.com. I accept responsibility for reporting all injuries and illnesses to my parents, team doctor, athletic trainer, or coaches associated with my sport including any signs and symptoms of CONCUSSION.

**Consent and Release from Liability Certificate for
Sudden Cardiac Arrest and Heat-Related Illness (Page 3 of 4)**

This completed form must be kept on file by the school. This form is valid for 365 calendar days from the date of the most recent signature.

School: The Conservatory School @ NPB School District (if applicable): Palm Beach County

Sudden Cardiac Arrest Information

Sudden cardiac arrest is a leading cause of sports-related death. This policy provides procedures for educational requirements of all paid coaches and recommends added training. Sudden cardiac arrest is a condition in which the heart suddenly and unexpectedly stops beating. If this happens, blood stops flowing to the brain and other vital organs. SCA can cause death if it's not treated within minutes.

Symptoms of sudden cardiac arrest include, but not limited to: sudden collapse, no pulse, no breathing.

Warning signs associated with sudden cardiac arrest include: fainting during exercise or activity, shortness of breath, racing heart rate, dizziness, chest pains, extreme fatigue.

It is strongly recommended all coaches, whether paid or volunteer, are regularly trained in CPR and the use of an AED. Training is encouraged through agencies that provide hands-on training and offer certificates that include an expiration date.

Automatic external defibrillators (AEDs) are required at all FHSAA State Series games, tournaments and meets. The FHSAA also strongly recommends that they be available at all preseason and regular season events as well along with coaches/individuals trained in CPR.

What to do if your student-athlete collapses:

- 1. Call 911
- 2. Send for an AED
- 3. Begin compressions

FHSAA Heat-Related Illnesses Information

People suffer heat-related illness when their bodies cannot properly cool themselves by sweating. Sweating is the body's natural air conditioning, but when a person's body temperature rises rapidly, sweating just isn't enough. Heat-related illnesses can be serious and life threatening. Very high body temperatures may damage the brain or other vital organs, and can cause disability and even death. Heat-related illnesses and deaths are preventable.

Heat Stroke is the most serious heat-related illness. It happens when the body's temperature rises quickly and the body cannot cool down. Heat Stroke can cause permanent disability and death.

Heat Exhaustion is a milder type of heat-related illness. It usually develops after a number of days in high temperature weather and not drinking enough fluids.

Heat Cramps usually affect people who sweat a lot during demanding activity. Sweating reduces the body's salt and moisture and can cause painful cramps, usually in the abdomen, arms, or legs. Heat cramps may also be a symptom of heat exhaustion.

Who's at Risk?

Those at highest risk include the elderly, the very young, people with mental illness and people with chronic diseases. However, even young and healthy individuals can succumb to heat if they participate in demanding physical activities during hot weather. Other conditions that can increase your risk for heat-related illness include obesity, fever, dehydration, poor circulation, sunburn, and prescription drug or alcohol use.

By signing this agreement, I acknowledge the annual requirement for my child/ward to view both the "Sudden Cardiac Arrest" and "Heat Illness Prevention" courses at www.nfhslearn.com. I acknowledge that the information on Sudden Cardiac Arrest and Heat-Related Illness have been read and understood. I have been advised of the dangers of participation for myself and that of my child/ward.

I promise to act in away that would never incur shame, scorn or disgrace on my school, my teammates, my coach or myself.

I understand that I am a public representative of TCS and that my actions are representative of the entire school community.

I will wear the TCS uniform with pride and take full responsibility for my actions as a student athlete.
